

EPnet™ EP7100 QubeLoader

The EP7100 QubeLoader is a simple way for staff to credit their accounts. It is specifically made to take cash payment (be it coin or notes) and load it into the user's account. It works like a bank cash machine, only in reverse. With this loader, you simply present your card and load coins and/or notes into it. This amount is then added to

your account. The bright, fluorescent read-out will verify the new balance. Units can be sited at a central point or situated around the building at convenient locations. It will accept £5, £10 and £20 notes and coins from 20p to £2, although in practice, a lower limit of £1 coins is recommended.

€5, €10 & €20 notes are accepted in the dual currency version.

FEATURES

- ✓ Note, coin or note & coin models
- ✓ Sterling and dual currency Sterling & Euro models available.
- ✓ Full audit trail, linked to PC giving management information on money inserted
- ✓ System Manager has access to all "money in Loader" details from their PC.
