

## EPnet EP300 MPoS Terminal & Docking Station

The EPnet EP300 tablet MPoS terminal is the latest, state of the art touch screen mobile till, available in 8.3" or 10.1" formats. The unit itself is based on the Cielo 300 range and is designed for commercial use featuring an aluminium alloy frame and Gorilla® glass screen. It is drop resistant to 1m and IP65 rated dust and water resistant.

The EP300 retains all the software features of our successful EP3000 EPoS terminals in a mobile format. When coupled with the docking station the EP300 converts to a fully functional EPoS terminal with a number of ports, accessed from beneath for connecting various peripherals including customer displays, card reader, bar code scanner, cash drawer and printer options all being available.

The EP300 is fully integrated into the EPnet catering and vending system.

All programming of the unit is made from the manager's workstation. All sales reports and analysis are also processed on the network. Detailed management reports are readily available from the manager's workstation.

The EP008 secure docking station enables fast-charging of the MPoS via the bottom charging contact pads. Additionally, it allows tablet-locking in the dock via the Kensington Lock feature.

When unlocked from the secure base the EP300 allows the operator to leave the counter and go to your customers as an ordering point. It can be fitted with optional hand or shoulder straps.

EP910T MPoS terminal	Specification
